The Answer is

CASIO SOLUTION

V-R100

Price is very economical !!!

Compact ! Stylish ! Tough ! Ecology ! V-R100 is a new generation cash register

Casio V-R100 has a compact and stylish design without losing its toughness. The pre-installed ECR application will support your store management in more efficient way.

All-in-one machine built-in with all functions necessary for store management.

V-R100 is equipped with clear view 10.4 inch LCD touch panel, pop-up customer display, and thermal printer which is able to use 50mm and 80mm roll paper. It can be used out of the box without difficult settings.

PHOTO 1 PHOTO 2

Stylish design

The design of the terminal is important since it will be used in a store where many customers will see. V-R100 is equipped with motor-driven tilt mechanism. Even the LCD panel is in the flat position or in an upright position, V-R100 will keep its sharp design.

PHOTO 4

Environment-friendly with low power consumption

Power consumption of V-R100 is 20W during operation (4W when stand-by), which is much less than general PC based terminal. More you use the V-R100, more you save the electricity cost.

Small footprint will enable to fit in any places.

V-R100 compact body measuring only 395mm wide, 237mm deep, and 229 high, will fit in any places, saving shelf space for selling products.

The optional drawer can be set separately from the terminal which will enable flexible layout.

PHOTO 3

Business terminal must be tough

V-R100 is compact and stylish, but tough. It conforms to the IPX2 drip-resistance* which is important for use in restaurants.

* Dripping water at an angle up to 15 degrees from vertical has no harmful effect.

PHOTO 5

Built-in rear customer display.

Built-in thermal printer which is able to use 50mm and 80mm roll paper.

The optional drawer can be set separately from the terminal which will enable flexible layout.

Easy to use and stylish touch panel equipped with motor-driven tilt mechanism.

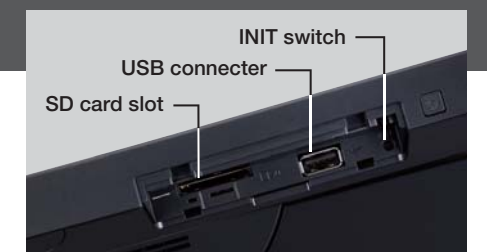

Touch panel screen conforms to the IPX2 drip-resistance which can be operated even with wet hand.

V-R100 has superb scalability to support further development.

Connect with various peripherals

Terminal is equipped with wired LAN port and RS-232C port. Memory card slot for storage of sales data on SD memory card.

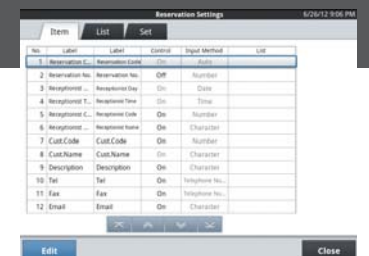

Customer management to provide better service

This application can be used to analyze store visit frequency and consumption amount by customer, and prepare customized customer list. Possible to offer discounts and issue coupon to preferred customers.

Reservation management to forecast sales

Record and manage information such as table reservation or confectionery birthday cake reservation. Linking with the customer management and sales management application makes possible to centralize the information.

Check the sales result anytime

The V-R100 receives e-mails sent from a PC or mobile phone and automatically reply by email the latest sales result or reservation report.
