

## **What is a POS System?**

**In short our Point-of-Sale System is simply a system that makes a business much more efficient, lowering the costs of running the business while improving customer service and making the business more pleasant to work in.**

**The Cornerstone POS System Software is designed for retail, restaurants, bars and any combination thereof. It offers a complex electronic cash register which is capable of extremely detailed reports and has memory functions which allows users to look up reports from the past or generate monthly and yearly reports. Our software also offers inventory management capabilities, payroll with reporting, server reporting, coupon and promotional discounts tools and reporting, till assigning/reporting, table assignments, quick bar with tab functionality, bar-code technology, the easiest check-splitting feature of any POS and many more features!**

**The hardware with our POS System includes a touch screen, a cash drawer, and a credit card swiping system, a printer and a computer loaded with the POS software. Additional features and equipment are available.**
